

## **BioVigil Featured in Federal Health & Medicine Publication**

### *Electronic Hand Hygiene Solution Facilitates Positive Client Outcomes*

ANN ARBOR, Mich. ([PRWEB](#)) December 13, 2018 -- Protecting patients against Healthcare Acquired Infections (HAIs) is always at the forefront of the minds of healthcare leaders. Experts agree that proper hand hygiene is the most effective way to prevent HAIs, and electronic hand hygiene solutions are the most effective way to solve this problem. Federal Health and Medicine, the publication for definitive health and medical research programs, discusses these topics in a [recent interview with Sanjay Gupta](#), CEO of BioVigil.

BioVigil's Solution reminds healthcare workers to sanitize/wash their hands, if they forget. Unique to BioVigil are the visual and audible reminders. In the middle of the badge is a colored LED light in the shape of a hand. The light changes colors based on compliance and shows patients and families if their healthcare worker has clean hands. BioVigil assists hospitals with patient satisfaction by helping patients feel safer, increasing trust in the hospital caring for them.

Built on the foundation of over 150 Million hand hygiene opportunities, BioVigil is an outcomes driven company that helps clients achieve sustained 97% hand hygiene compliance. A few examples of client outcomes include: 45%+ reduction in CLABSI and CAUTI, 55% reduction in C. diff, 18% reduction in employee absenteeism, increasing patient satisfaction from 37th to 95th percentile, and a 10% increase in bed capacity with reduced length of stay.

#### About BioVigil

BioVigil is the market leader in hand hygiene solutions. Headquartered in Ann Arbor, MI, BioVigil's patented technology enables hospitals to sustain 97% hand hygiene compliance and reduce Healthcare Acquired Infections with a gentle reminder system that increases patient engagement. At the center of the solution is BioVigil's Data Suite which delivers actionable insights for hospitals to optimize workflow. These insights are available on demand or in easy to understand reports. Our team is a dedicated collective of healthcare warriors, technology enthusiasts, data analysts, seekers of excellence, and passion-fueled folks – we really want to make a difference in healthcare, and ultimately partner with our customers to help save lives.
